

Our Objectives

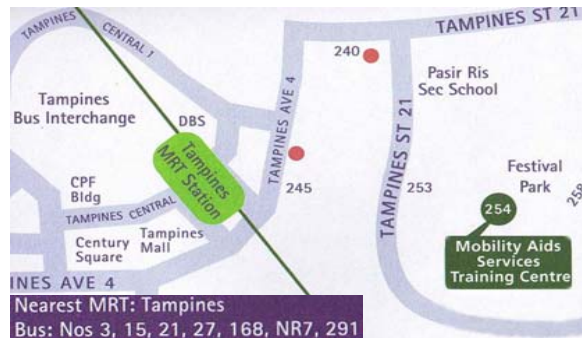

-  To serve and support the community of elderly and needy with physical disability.
-  To provide free loan of mobility aids equipment to the needy families having financial difficulties.
-  To encourage independence and initiative amongst people with physical disability.
-  To create awareness to create a better accessible environment for people with physical disability.
-  To promote spirit of volunteerism among elderly, disabled, youth and the general public.
-  To provide training for volunteers and caregivers to serve the community.
-  To support humanitarian and community projects to the needy either local and overseas (especially those disaster affected countries).
-  To increase public awareness to save the earth by re-use and recycle all unwanted mobility aids equipment and many other recyclable items.
-  To reduce volume of landfill wastes resulting from disposal of mobility aids equipment and other recyclable items by re-using and recycling them.

About Us

In our modern society, there are many needy living with physical challenges that do not have the financial resources to get themselves wheelchairs and other mobility aids equipment, in order for them to live their lives to its fullest. There are many used and unwanted hospital beds, wheelchairs, commode chairs, walking frames, walking sticks, crutches and other mobility aids equipment that could be repaired, re-used and recycled to people in need.

Mobility Aids Services & Training Centre is a joint project between Kampung Senang Charity & Education Foundation and Mobility Aids Repair Services Centre, to provide a wide range of services and supports to the physically disabled and less fortunate in our society.

One of our main roles is to collect, repair, re-use and recycle any used and unwanted mobility equipment, so that these refurbished mobility aids equipment can then be re-distributed and free loan to the needy families. We are greatly inspired to provide training to volunteers and caregivers who are keen on mobility aids repair and maintenance, wheelchair handling, befriending with the elderly and physically disabled, etc.

Education on recycling plays an important role to save our earth and ourselves, thus it is also our mission to create awareness and to educate the public on recycling and waste reduction.

Mobility aids repair and maintenance training conducted for participants from various VWOs

Our Services
